

# Shalom School-Based Health Care Program

---

## Telemedicine visits available for students, families and staff

With schools closed, Shalom Health Care Center is available to ensure our students have access to the same health care services they did while school was in session.

Our healthcare providers are available for Telemedicine visits, allowing families to access healthcare services from the safety and convenience of their own homes, using a telephone or computer.

---

Contact a Shalom representative to learn more about scheduling a telemedicine visit today!
